

Technology Take-Aways This Trimester

Millbury Street Elementary School & North Street Elementary School

A new year, new computers! Over the summer, our computer labs were outfitted with brand new Dell computers. All students in grades 2 through 6 now have their own unique passwords for their Google accounts. They have done a tremendous job learning their passwords and accessing their accounts on their own.

Internet safety was how we kicked things off! We learned how to become respectful and responsible users on the internet and while on the computers. We reviewed Grafton's Acceptable Use Policy and learned the basic rules to help us throughout the year.

We need to keep safe and not share our personal information with others. It is important to keep telling a trusted adult if you feel uncomfortable. Make sure to Keep away from Internet strangers. We also talked about the importance of treating others the way we want to be treated and choosing our words carefully.

Grade 2

* Kid Pix - A unit teaching students how to navigate a computer program and to save each slide individually creating comprehensive slide show with sound to share with the class.

Grade 3

*Internet Safety Slides - Students recap their very important learnings of Internet Safety while reintroducing themselves to Google Classroom and Google Slides.

Google Slides
Google Inc.

Grade 4

* Welcome to the Web - a unit teaching students different aspects of the web and how to navigate around it - ask your student about the challenge activity and if they caught the criminal!

* Tagul - combining our language arts and technology skills to create fantastic word clouds

Grade 5

* Difference between plagiarism & copyright
* Website evaluation - what makes a website credible? Remember CRAAP
* Research projects - How to look for resources, compile notes, create slide show and present information

Grade 6

* Scratch: create animations, games, etc. and learn the beginning steps to computer programming.
